

What users are saying about CompareMedsRx

Real experiences from people who are paying less for the medication they need.

“

I had to pick up my mom's meds. She's on Medicare. With Medicare the price was \$101. I used CompareMedsRx.com and got it for \$42!

My insurance wanted \$32 for a script. My doctor's office shared a discount card where I could get it for \$22, but I used CompareMedsRx and got it for \$9.50. Love it!

I was prescribed Azelaic Acid by my dermatologist for my Rosacea and of course, insurance doesn't cover it. Luckily, I had heard about CompareMedsRx from a friend. When I used the site I was able to save \$16, my cost went from \$50 to \$34.

An employee had to get medication for her child. Insurance didn't cover it and it was over \$100, so she used CompareMedsRx and got it for \$15! He was so excited that it worked for his employee and kept saying how amazing this is and will start telling others.

I saved 46% on 3 prescriptions compared to my insurance. Not only do I save money, but now I can use my FSA for other medical bills.

I have a chronic condition that requires multiple medications. Without discount drug cards I would be struggling to make ends meet. This site is a life saver for me.

“

My diabetes medication is \$174.89 which is ridiculous. I downloaded CompareMedsRx. I used it at the local Walmart where I get my prescription and to my surprise my cost was \$18. WOW what a discount.

My cousin told me about this site. When he showed me how much he's saving on his medication I went and signed up the same day.

I just used CompareMeds to find lower costs for my prescription meds. I am very happy with the savings I found. It saved me a ton of time and nearly half the cost compared to the price the pharmacy originally told me. I want to share this with everyone!
